RHK Technology Inc. Hires New R&D Project Manager

TROY, MI, January 16, 2009 – RHK Technology, Inc. an integrated surface science solution manufacturer, recently hired Dr. John Keem as Engineering Project Manager.

Dr. Keem's experience and expertise provide a broad and deep base for engaging and implementing advanced engineering and development programs at RHK. As market opportunities expand into diverse areas of nanotechnology, such new programs and products will ensure RHK maintains its position as preeminent provider of Scanning Probe Instruments.

Dr. Keem has a PhD in Solid State Physics from Purdue University and 25 Years of experience managing research and engineering programs and nanotech product commercialization.

About RHK Technology

RHK Technology develops and manufactures a complete line of scanning probe microscopes for the performance and customization needs of research scientists around the world. The SPM industry leader in innovation, reliability, open architecture, and customer support, RHK has delivered a consistently superior product for twenty years. Our newest products bolster a reputation for uncompromised excellence.
